

Riverside Memorial Park is one of the area's best keep secrets. This beautiful city park is located along the shore of Lake Henry in Blair, WI. Lake Henry was first created in 1873 by the installation of a grist mill dam. The current dam is maintained by the City of Blair for flood control and as a source of water for low flow augmentation of the Trempealeau River. Our goal is to...

**“IMPROVE LAKE HENTY WATER QUALITY FOR FOUR SEASON RECREATIONAL OPPORTUNITIES BY REMOVING SEDIMENTATION”**

**Please help us restore Lake Henry to a beautiful destination spot that all can enjoy.**

## Lake Henry Dredge Project

In a 2013 Lake Henry Long Range Management Plan, an 82% majority of community members were in favor of dredging.

Since October of 2017, the City of Blair's Parks and Recreation Committee has been working with several local volunteers and the design firm, SEH, in planning, permitting and obtaining necessary approvals to improve Lake Henry through the means of removal of approximately 200,000 cubic yards of sedimentation via hydraulic or mechanical dredging.

Please visit the City of Blair's website at <http://www.cityofblair.org/park-lake--camping.html> (hover over the Park, Lake & Parks tab and select the Lake) for more information on the overall history, design process, other projects, impact on the community, timeframe and FAQ's, related to the project. Please stay tuned for a public information meeting coming in April 2020.

Currently, all required WI Department of Natural Resources and Corps of Engineers permitting is completed and in hand, and the construction plans are 99% complete.

This project is estimated to cost approximately \$1,950,000.00 to \$2,200,000.00. The city of Blair has committed \$800,000.00 towards the project financing. There are additional commitments from the City to establish a fund for the ongoing maintenance of the lake in an effort to avoid these large future expenditures. With that, we are roughly \$1,400,000 short of the goal.
